

Object: Joint VascAgeNet-ESVM session at ESVM Meeting, call for abstract

The Swedish Society of Vascular Medicine (SVM) has the privilege to organize the 8th Annual Congress of the European Society of Vascular Medicine (ESVM) in Stockholm in October 6-8 this year. For more information on the ESVM 2022 Congress, please visit the official homepage: [https://www.mkon.nu/esvm\\_2022](https://www.mkon.nu/esvm_2022)

Considering the innovative research on vascular ageing and arterial stiffness performed in the VascAgeNet network ([www.vascagenet.eu](http://www.vascagenet.eu)), the ESVM 2022 scientific congress committee has proposed a joint session between the network and the SVM. The session will be entitled *Vascular ageing and early life programming of adult cardiovascular disease*. We are now delighted to invite young VascAgeNet investigators to submit abstracts to the ESVM 2022 congress with the opportunity to participate with a 10-minute oral presentation in this joint session. VascAgeNet will cover fees (until a maximum amount of 1000 Euros) to participate to the congress for the three abstracts selected for oral presentations. We especially encourage young researchers (up to 40 years) from ITC countries to participate!!! (ITC country list is available here <https://vascagenet.eu/itc-grants>).

The deadline for the late breaking abstract submission is **July 30<sup>th</sup>** and submission is performed via the congress website. To be chosen for the VascAgeNet session, please tick the box for “VascAgeNet” on the submission site.

For any additional information, do not hesitate to contact us: [louise.dencker-ziegler@regionstockholm.se](mailto:louise.dencker-ziegler@regionstockholm.se) , [rosa-maria.bruno@inserm.fr](mailto:rosa-maria.bruno@inserm.fr)

We hope to see you in Stockholm in October!

With best regards,  
Louise Ziegler  
on behalf of the ESVM 2022 scientific committee

Rosa Maria Bruno  
On behalf of VascAgeNet
